

## What We Bring to the Project

We re-imagine ordinary spaces to create the extraordinary — beautiful, organized, functional, and comfortable — by applying the arts of adaptive re-use and creative utilization. Residential, commercial, historical, or institutional, we make any spaces, old and new, distinctively yours.

As the agents of your vision, we work with you to define your requirements, create a plan that balances your budget and your schedule. We determine what can be saved and re-used and what needs to be added. Then we detail the elements and activities required to complete the project.

Those elements — objects, shapes, colors, textures, textiles, wood, metal, people, food, function, and more — and their placement help fulfill your vision of inviting comfort and functional utility, even as they reflect your personality.

---
